## Resolved Issues

### Defect Corrections

The following reported issues are corrected in this release.

Jira Number	Summary	Notes
CMW-89	Recalculate the Marking Period and Grade Component grade averages for all student when user navigates to the Grade Overview screen	This will help ensure that the averages for marking periods and grade components are kept up-to-date and refresh each time the user clicks or returns to the Grade Overview screen.
CMW-107	Start Time and End Time changes for multiple students when one student updated	The time value will only change for the student being updated.
CMW-108	Skill grades is counting as "0" points when a user clicks through tasks	If a user clicks or moves through a cell with keyboard keys the value of the cell will remain "00" if the user does not type a value in the cell.
CMW-24	In the Skills Grading Grid the tasks that apply to other marking period should be color coded purple	
CMW-20	A teacher is able to override an office person's attendance code/attendance condition	Once an admin user selects an attendance condition a teacher will not be able to change the condition for that student and date.
CMW-11	The "CDOS" button incorrectly opens the Work Ethic screen.	
CMW-38	Knowledge Grading screen is allowing negative points	
CMW-111	System does not remove "Start and End Time" error message until refresh page.	Any error related to the Start and End Times can now be cleared by clicking the "X" icon on the message box.
CMW-109	"Incorrect Syntax" error message when adding a specific Discipline note	The discipline referral screen should now allow any characters in the notes area without producing an error.
CMW-93	Error message when using "Pivot" button on Skill grading page	No error message should appear when using the Pivot button.

Jira Number	Summary	Notes
CMW-22	A teacher should be able to edit/enter scores for any SKILL task in previous marking periods	
CMW-28	When a teacher clicks on a different marking period button it should stay on the specific grade component (Knowledge, Skill, WE) they were viewing	For example, if a user is on the Skills screen for MP 2 and clicks on the button for MP1, the screen will update to the Skills grid for MP1 instead of defaulting back to the Grade Overview screen for MP1.
CMW-95	The wrong rotation roster of students is display on the gradebook grids for Knowledge, Skills and Worth Ethic grading	<p>When a teacher is viewing the CURRENT marking period for any of the grade screens, only students that are currently enrolled as of the current system date will display (current rotation students). Any students for rotations/enrollment ranges that starts after the current date or that have ended before the current date will not display in the <b>current marking period</b> screen.</p> <p>If the teacher views a grade screen for a <b>previous or future</b> marking period (NOT current MP) then ALL students that are active during any portion of the marking period will display.</p> <p><b>Please Note:</b> In a future release we will add the ability to filter for active/inactive students so that teachers can decide to view only the students in the current rotation or students in any rotation for that marking period.</p>
CMW-104	Allow labels for "Marking Period" and "MP" to be changed to "Grading Period and "GP"	This is intended for CA customers where the term "Grading Period" has more significance then the term "Marking Period".
CMW-73	The Work Ethic Gradebook is not defaulting to the current month as it should	The Work Ethic grade grid will now default to the current month IF viewing the current Marking Period. If a teacher clicks on a previous or future marking period, then the FIRST month of that marking period will be the default month.
CMW-102	User should NOT receive "exceeds max points" error message on Knowledge screen if class set to "Extra Credit" = YES	Teachers will be able to assign scores that are greater than the Max Points of a Knowledge activity if the class is set to allowing Extra Credit.

Jira Number	Summary	Notes
CMW-14	User gets the wrong error message of "Grade Value Exceeds Max Point Vale" on the Skills gradebook when a decimal value is entered.	If a user gets attempts to enter a decimal value as a rubric grade they will receive the message saying that decimal values are not allowed.
CMW-81	Community Classroom / Non-Class Hours	Details of enhancement explained below.
CMW-13	Inactive activities should not appear on the Knowledge grading gradebook screen	If a Knowledge Activity is marked "Inactive" it will NOT display on the Knowledge gradebook grid.

## New Application Features

### 1. Non-Classroom Hours screen

A new tab has been added to the Student Snapshot which allows Non-classroom hours to be recorded for students. The intention is to record student hours that occur outside of the normal class attendance hours such as on-the-job training or community service hours. . A school can define the specific categories that are tracked and displayed on this screen.

This specific screen only allows entry for individual students but a batch screen is in development that will allow hours to be entered for a whole class roster of students at one time.

## 2. Login Message Pop-up

The Login message is now available as a pop-up screen that display when the teacher logs into Teacher Web. This feature helps ensure that teachers are aware of important messages and is similar to the login message features already available on the windows (Admin) side.

Remember that these login messages are composed on the windows ClassMate side under **System Administrator > Log In Message Management**. The feature must also be activated under **ClassMate Custom Control** on the **Misc** tab.

The three possible status conditions for Login Messages are:

- **Off:** No login message will be visible to teachers
- **On:** Login messages will be available only from the top-right of their Teacher Web screen and teachers will need to click on the red circle icon to view messages. The messages will NOT display automatically on login.
- **Automatic:** The login message will display automatically on login within a pop-up window. Teachers can also click on the red circle icon in the top-right to view the messages at any time after login.

*Below: Red circle icon in top-right will display available message when clicked. Click again to close*
