Parent Portal Enhancements

Parent Portal > Form Submissions > Administrators can now add forms to the Parent Portal.

To add a form:

Step 1

Parent Portal > Joomla Admin. > Select Site > Select Media > Select Forms > Under Upload Files > Select "Choose File" > then find the PDF file you would like to upload > once you have selected the file you should see the file name in the window next to "Choose File" > select Start Upload.

Step 2

Parent Portal > Joomla Admin. > Components > Parent Portal > Forms Submission Processing > Enter your forms Name > check the Enable box > enter the forms code > select your form from the drop-down > you can enter in the message you would like for this form, and select the indicators you would like applied to this form > Select Save.

Step 3

ClassMate Windows > Modules > System Administration > Master Code Maintenance > Student Form Check List > Add the next available ID number, a Description, and the Ref ID (the Ref ID needs to be the same value as your Code value, that you gave to the form in the Parent Portal) > Select Save.

Note: if you are using the "Include Permission Indicator" you will need to add two additional codes. One for the 'Yes' value (Example: CODE-Y), and one for the 'No' value (Example: CODE-N).
