ClassMate Teacher Web

Release Notes

February 2018 Release

www.harrisschoolsolutions.com

Release Date: 02/17/2017 Document Date: 02/11/2017

New Features

New Application Features

RR

School Solutions

The following new features have been added to Teacher Web in this release.

CMW-403 Teacher Web Page security

It is now possible to assign permissions or revoke permissions to just certain screens in Teacher Web. For example, using this feature you could setup one set of teachers to have access to just the Attendance screen and the Work Ethic grading grid while another set of teachers could have access to Knowledge, Skill, Work Ethic and Knowledge Bank. A client can also control with tabs display on the Student Snapshot pop-up screen. Thereby, admin can control which tabs teachers can view and use.

Security access is assigned on the "window" admin side under the module: **System > Administrator > User Module Management.** Within the "Modules/ Reports" menu you will notice a new "Web Pages/Tabs" folder has beened added. All Teacher Web screen permissions can be found under this "Web Pages/Tabs" folder.

For more information

The Teacher Web Permissions have been grouped together under categories for convenience. One group "Student Snapshot" holds all the permissions for displaying tabs on the Student Snapshot popup screen. The other categories are grouped by general functionality:

Permission Sub-foldser:

- **Attendance:** class attendance, non-class attendance, and certification hours screens.
- **Grading:** all gradebook screen including those related to Knowledge, Skill, Work Ethic and PDP grading
- **Reporting:** holds permission the the main report menu on Teacher Web. Permissions to individual reports is still controled by items under the "Reports" folder.
- **Student Recognition:** currently only for Course Certification Roster but may hold other miscellaneous student data screens.
- Student Snapshot: sub-tabs of the Student Snapshot pop-up

When permissions are removed from teachers

When access is removed for a certain screen or a certain tab, one of two things will occur for the teacher: the link or button which accesses the screen will disappear or the button or link will remain but show a "You do not have access" message.

The typical result of removing a permission will be that the link will disappear from the teacher's view. For example, if permissions to the "Discipline" tab are removed, then any time a teacher opens the Student Snapshot for a student they will not see the "Discipline" tab. Similarly, if access to the "Knowledge Bank" is removed from a specific teacher, then a teacher would no longer see a "Knowledge Bank" link on the left navigation bar.

Before access is removed for Discipline, SDI, and Medical Alerts tab.

Before permissions to the "Knowledge Bank" have been removed

ARRIS

School Solutions

After permissions to "Knowledge Bank" have been removed

For more information

One import exception if If permissions to specific grading components are removed (Skill grid, Knowledge grid, WE Grid), the cooresponding buttons will NOT be removed and instead the user will get a message saying that access is denied. For example, if permissions are revoked to the Skills grid the Skill button would NOT dissappear since the button also shows that 40% of the grade makes up the MP Formula and we do not want to hide this information from users.

The "Access Denied" message the teacher would see if clicking on a grade component from the MP formula if they do not have permission to view that grading grid

chool Solutions

A teacher can now see a student's Career Pathway from the Demographics screen of the Student Snapshot screen. (Note: this Career Pathway functionality does NOT connect to the Industry Sector & Pathway functionality as used by California clients.)

CMW-311 Course Certification roster and Student Snapshot tab

Teachers can now enter course certification information on Teacher Web using two different screens:

- "Course Certification" screen which lists all students in the class
- "Certifications" tab on the Student Snapshot screen

	n Technician Class Meets: M T W T	F(750AM-1020AM)			Search

	(P) (F)	P F 2018-02-08	P F 2018-02-08	(P) (F)	

A teacher can identify which students have attempted specific certifications and indicate what date the certification was taken and if which students have passed. The "Course Certification" roster screen will be displayed as a link on the left-hand navigation bar if permissions have been assigned. The "Certificaton" tab will display as a new tab on the Student Snapshot screen and will show all certification info for a single student at a time.

Setup Steps:

In order to use the Certification screen on Teacher Web, certification records must be defined and assigned to courses on the window admin side via the **Curriculum Options > Course Certifiation Management** module.

To enter certification information for a class:

- 1. Click the "Course Certification" link from the left naviagation bar.
- 2. Use the classdrop down at the top to select a class.
- 3. For a certain student row, click 🕐 to mark a student as Passing a certification.

Click ^U to indicate a student has not passed/ failed a certification attempt.

- 4. The date field will default to the current date. Click the date and use the date picker calendar to change the date when the certification was attempted / passed.
- 5. Repeat steps 3 and 4 for other students.

Certfication tab

An accompanying "Certifications" tab can be found on the Student Snapshot screen. This tab displays certification data for one student at a time. Teachers can also update certification dates and pass/fail status from this screen.

This tab contains three sub-tabs. Only the "Course Certification" sub-tab is discussed here. The "Pathway Crosswalk" and the "Course Certification Crosswalk" screens are discussed below.

The "Course Certification" sub-tab on the "Certification" Student Snapshot tab allows all the same data tracking as seen on the full Course Certifications roster screen. Teacher can enter the date for when a certification was earned/attempted and indicate if the student has passed or failed the certification.

CMW-313 Gap Item: Course Certification Crosswalk

The Course Certification Crosswalk functionality, which was previously only available on the Citrix/windows side, is now available in Teacher Web on the Student Snapshoht. This feature shows which skill tasks are aligned to which Course Certification and also shows a student's progress in fulfilling the tasks toward a certain certification. In this way a teacher is able to visually determines which certifications a student is ready to attempted based on the skills that they have acquired.

000603	Assesses and repairs plasti	00	F	2018-02-08		NG		

Setup Setups:

In order to use the Course Certification Crosswalk screen on teacher web, certification records must be defined and assigned to courses on the window admin side via the **Curriculum Options > Course Certifiation Management** module. Then certifications must be linked to Skill tasks via the **Curriculum Options > Course Certifiation Assignment** module.

Cross Walk display:

Skill tasks are shown down the left side of the grid. Teachers may sort acending or decending by either "Skill Description" or "Skill ID" by clicking on the header lables for those columns. Certifications will display along the top of the grid. A teacher can click on the column header for any certification to bring to the top all skill tasks aligned to the certification.

Other Features

- (1) Grade column
- (2) POS column
- (3) % Completed grid row:
- (4) % Completed field:

For more information

The intersecting cell of each certification column and each skill task row will show as one of these 5 states:

	If a skill is not assigned to a certain certification
NG	If a skill is assigned to a certification but the student has not been graded for that skill.
Р	If a skill has a passing score
F	If a skill has a score below passing (failing)
NA	If a skill is assigned to the certification but not required for this specific student.
	(A teacher can exempt a student from a certain task on the Skill screen

(A teacher can exempt a student from a certain task on the Skill screen by clicking the science and setting "REQ'' = "F''.)

CMW-314 Pathway Crosswalk

The Pathway Crosswalk functionality, which was previously only available on the Citrix/windows side, is now available in Teacher Web from the Student Snapshot. This feature shows which skill tasks are aligned to which Career Pathways and also shows a student's progress in fulfilling the tasks toward a certain pathway. In this way a teacher is able to visually determines which Career Pathway skill requirements a student has completed .

Setup Setups:

In order to use the Pathway Crosswalk screen on teacher web, career pathways records must be defined and assigned to courses on the window admin side via the **Curriculum Management > Career Pathways Management** module. Then pathways must then be linked to Skill tasks via the **Curriculum Management > Career Pathway Assignment Assignment** module.

Cross Walk display:

Skill tasks are show down the left side of the grid. Teachers may sort acending or decending by either "Skill Description" or "Skill ID" by clicking on the header lables for those columns. Career Pathways assigned to the current course will display along the top of the grid. A teacher can click on the column header for any of any pathway to bring to the top all skill tasks aligned to that pathways.

Other Features

- (1) Grade column
- (2) POS column
- (3) Date: Date the skill was completed or last graded
- (4) % Completed grid row: percent of skill completed for satisfying a specific pathway
- (5) % Completed field:percent of all assigned skills mastered

Pa	thway Cross	swalk Course Certification Crosswalk	Course Certification

Include Employability:		Employability %:	0	
Include PDP:		PDP %:	10	
MP Cumulative Option:	Cumulative MP1 - N	1P2;MP3 - MP4		•

To make it clear on the Teacher Web side that a class is using Cumulative style grading several labeling changes were made on the Grading screen for the formula area.

- The plus signs (+) and equal sign (=) were removed since they don't apply to comulative calculations.
- The % amount was removed from each marking period button. This is because individual MP do not carry a set percentage of the grade when using cumulative grading.
- An "Overall Progress" button was added to show all cumulative grades for each MP in one place
- A label line was added below the Final Grade formulat line to indicate how the cumulative grade will be calculated. There are two basic methods depending on whether a cumulative grade will start fresh at a certain point during the year:
 - "Cumulative Across Entire Year"

2	CM Web Staging	CM Web Staging Today: 01/27/2018

Defect Corrections and Enhancements

The following reported issues are corrected in this release.

Jira Number	Summary	Notes
CMW-716	Arithmetic overflow error when entering grades for some teacher on CA Alpha grade screen	An "arithmetic overflow" error was displaying when teachers were entering to enter letter grades on the CA letter grade screen. The error will no longer display and the grades will successfully save.
CMW-715	System is displaying incomplete "Work Ethic Comments" popup upon clicking bubble icon from the first/second column.	When using the Work Ethic screen inside of Grading the user was not able to see the entirety of the of the WE comment pop-up window that displays when the attendance bubble is clicked. Now the entire pop-up window displays.
CMW-711	System is not displaying "Skills" page properly.	The Skills screen in Grading was not displaying students when the filter was set to "All" and skills were listed on the left. Now students will display in the grid properly.
CMW-700	Not able to see the Grading screen for certain teachers if space character in course title.	The main Grading screen would not finish loading for teachers if the default class had one or more space characters at the end of the course title. Teacher Web will not correctly handle and load grading screen for classes that have space characters at the end of the course title.
CMW-693	Nassau BOCES > Skill Grades not loading in Teacher Web	Ask about resolution

Jira Number	Summary	Notes
CMW-692	System is not displaying "Skill Grades" when students are on left side. (Production all clients)	The skill grade average was not displaying when the Skill grading grid was pivoted in way in which students displayed down the left-hand side. Now no matter which way the screen is pivoted the Skill average value will display correctly.
CMW-689	Knowledge listed as Unassigned but also as Graded "0"	A Knowledge Activity was showing as Unassigned (grey cell) when the "All" category filter option was selected. But when the teacher changed the category filter to a specific category activity showed as assigned with a grade of 0. This has been resolved so that unassigned categories will always show as being unassigned (in a grey cell) no matter which category filter is selected.
CMW-666	Comments not changeable & effecting grade change too	The Work Ethic Grading screen was not successfully updating the grade if a teacher attempted to edit but the WE grade and the WE comment at the same time. The teacher can now update the grade and comment at the same time on both the Knowledge grade screen and the Work Ethic grading screen.
CMW-663	System is not updating "PDP" grades under "Skill".	The PDP skill average was not updating correctly when a teacher entered or edited a PDP grades. Now the PDP average should recalculate correctly as grades are edited or entered on the PDP grading grid.
CMW-655	unable to delete "WE" comments.	Previously, when a teacher tried to delete a Work Ethic comment on the Attendance screen the comment would not get deleted. Now a teacher can click on the "trash can" icon to delete a WE comment.
CMW-653	System is not updating "Skill" grades.	The Skill average was not updating correctly when a teacher entered or edited a PDP grades. Now the PDP average should

Jira Number	Summary	Notes
		recalculate correctly as grades are edited or entered on the PDP grading grid.
CMW-645	Leading Zeros for Skill Scores not populating	When entering single digit rubric grades on the Skills screen the system is supposed to add a leading zero (02) so that the grades are consistent with the way rubric grades appear on the windows side. Previously, ,these leading zeros were not being added but after this fix leading zero will once again be appended to single digit rubric scores.
CMW-479	Change Final Grade Formula bar for Cumulative calculations	See details above. For CA.
CMW-602	Allow hiding Allow hiding of Hours, Completer Status and Credits column on CA Alpha Grading screen	See details above. For CA.
CMW-643	System is not displaying students upon un-assigning activity.	When a knowledge activity was unassigned from students on the Knowledge Bank screen the students' names were not being displayed after the unassign process was run. A list of the student who have been unassigned will now display.
CMW-629	Syntax Error when using '	A teacher would receive an "incorrect syntax" error message when a comma character (,) was used in the Notes area, especially in the Subject Line field. Now comma characters can be used without an error.
CMW-619	System is not allowing to select the class for activity assignment.	When assigning activities by class in the Knowledge Bank screen, a user was not able to select a class. A user can now successful select a class when assigning Knowledge Activities by class.

Jira	Summary	Notes
	Mork Ethics pot working on evenetted	Attendance was not displaying properly on
	work Ethics not working as expected	Attendance was not displaying property on
		attendance condition was colocted. Now the
		antendance condition was selected. Now the
		appropriate attendance bubble should show as selected (Λ T, P, etc) even if a negate day
		attendance condition has been selected by
		the office on the admin windows side
		the office of the autilit windows side.
CMW-610	Students Duplicate on Attendance	Students were being doubled on the
	Screen	Attendance screen often after work ethic
		grades were edited on the same screen.
		Editing work ethic grades should no longer
		cause the students to show as duplicated on
		the Attendance screen.
CMW-591	Knowledge activity score does not	Previously, the score for knowledge activities
	save	were not correctly being saved in certain
		circumstances. Knowledge activity score
		should now save correctly when the teacher
		moves off of the cell to another cell in the
		grading grid.
CMW-557	Progress Reports not saving	Teachers were experiencing several issues
		when attempting to save progress reports.
		Additional blank progress reports were being
		created and progress comments were on the
		progress report for one class where
		appearing on the progress reports for other
		classes. It was found that in certain
		situations the progress report where being
		creating using the first class in the dropdown
		list instead of the class that the teacher had
		selected. Progress Report will now save
		correctly and be attached to the class
		selected in the class dropdown.
CMW-553	Error received Scheduled Class Roster report	In progress

Jira Number	Summary	Notes
CMW-487	Certification Hours> Wrong selection of class in "Class Dropdown".	The new Certification Hours screen was previously not showing the correct students for the class that had been selected.
CMW-474	Calculation problem with Mid/Final Exams.	In progress
CMW-403	ClassMate Lite > Teacher web needs to honor the security setup in Windows (a.k.a ClassMate Lite)	See details above.
CMW-33	Add ability for the teacher to see the Career Pathway for each student on the Student Snapshot	See details above.
CMW-314	ClassMate Web > Gap>Pathway Certification Crosswalk	See details above.
CMW-313	ClassMate Web > Gap>Course Certification Crosswalk	See details above.
CMW-311	Teacher Web > Gap> Course and Student Certifications	See details above.
CMW-308	Hours updating issue on "Non Classroom Hours" screen when updated from "Student's Snapshot"	Previously, when a teacher entered non- classroom hours within the Student Snapshot the hours total would not immediately update unless the teacher refreshed the screen. Now non-classroom hour totals will recalculate right after the new hours are entered.
CMW-235	System is displaying all classes on "Un- Assign Activities from Class(es)" popup. System should display only those classes to whom activity has been assigned.	On the Knowledge Bank screen a teacher is able to select an activity and click the "Un- assign from Class" button to see a pop-up of classes to select. Previously, all classes were appearing in the pop-up but now only classes that are currently assigned to the activity will show on the pop-up screen.

Upcoming Features

Future improvements in consideration for the 2018 year

- Gradebook Grading Grids
 - Create a new column in the Knowledge grid to view a student's grade level or skill year
 - Hide the "POS" grading field on the Skills grid if a client is not using the POS grading method.
- Attendance Screen
 - A message should display when teacher is attempting to take attendance for a day the class does not meet
 - Making the work ethic comment box open higher on the page to avoid unnecessary scrolling
- Student Snapshot
 - View Student Interventions
 - Display the "Preferred Name" of a student
- Progress Reports
 - Display grade that is captured in a progress report snapshot
 - Add Class ID, Class Description, and Student Name
- Skill Grading
 - Make it so "Date Taken" is updated when a skill is regraded, even if the student has earned the same grade as the previous time.
 - Students with future end date should show as active on the skill grading grid (CMW-733)
