Resolved Issues

Defect Corrections and Minor Enhancements

The following reported issues are corrected in this release.

Release: 11/16/2021

Jira Number	Summary	Notes
CMW-882	Attendance Non-School Day	Not Valid School Day message was not displaying. Identified and fixed code to display 'Today is a Non-School Day' message at top right corner if individual student attendance attempted to be entered on Non-School Day. If Mark Remaining Present button is used on Non-School Day – banner error identifying 'INVALID DATE' will display. This reference School Day assignments set up in School Calendar Management.
CMW-968 26175 / 2039768	Grading > Work Ethics Student Count vs Student Names	Corrected Student Count to Match based on status selected: <ul style="list-style-type: none"> • ALL – total count includes Active and Inactive students • Active – only displays total of Active student count • Inactive – only displays total of Inactive student count
CMW-990	Course Certification Inactive Status Indicator adjusted	When student names toggled to display across the top the 'Inactive' indicator was not displaying. Fixed the display so if student is Inactive the flag will display regardless of toggle for student names across top or down left.
CMW-1011	Attendance Multi page > # students to display Filter	Adjusted filter code so if updating student count to display students displaying will update and user will remain on selected page and will not revert back to P1. For example if 75 students in class > default display is 25 students > if select 50 to display the remaining student names now display and you will remain on the current page as opposed to flipping to Page 2.
CMW-1093 / CMW-301 5139194 / 5205160 ENHANCEMENT	Student Snapshot Preferred Name Displays	When selecting student name to display Student Snapshot in Teacher Web, if preferred name entered in Windows Student Master module, it now displays underneath Legal Student Name
